Dr. Insecta, brings his “Bug Lab Experience” to the North Canton Public Library

NORTH CANTON, Ohio, June 26, 2014 – Nationally known, Dr. Insecta, will soon travel to North Canton with his zoo of insect creatures in tow. He and his Bug Lab will entertain families at the North Canton Public Library from 6-7 p.m. Wednesday, July 23, 2014. Families with children ages three and older are invited to visit the library to pick up tickets for the show that combines the science of entomology with the art of magic to create a new educational performance art genre. Dr. Insecta defines his Bug Lab as an “Ed-Fun-Cational” Eco Insect Adventure, but hundreds of thousands of children and adults simply know it as The Incredible Unforgettable Bug Lab Experience.

The Bug Lab is a perfect program for this summer’s “Fizz, Boom READ,” themed children’s summer reading program. Bill Maxwell (aka Dr. Insecta) has presented his ground-breaking performance across America at such venues as the National Aeronautics and Space Administration (NASA), science centers including The Cincinnati Museum of Natural History, numerous college outreach theater performances, metro parks and nature centers and countless elementary and middle schools throughout the United States. Dr. Insecta has been seen on major television networks including NBC, CBS and FOX.

The persona of Dr. Insecta is an amalgamation of many characters that Bill has perfected throughout his stage career. Some of his most influential contemporaries include Doug Henning; Harry Blackstone, Jr.; Bill Nye, the science guy; and of course, Penn and Teller.

Although Bug Lab is not a magic show, the illusions in the show provide the perfect platform to dramatically introduce audiences to the most interesting and essential animals on the planet! Bug Lab’s ultimate goal is to educate, encourage and inspire young entomologists of the future to discover this ever-expanding science of insects, who allow us to share their world.

Tickets are limited and are required. For additional information, please contact community relations manager, Christina Weyrick at 330.499.4712 x331 or ccooper@northcantonlibrary.org.
